Client Projects

5. Title : ==Solicitors== – [Open Site](#) (Requires VPN)

   Client : Govt of Canada, Nova Scotia

   Context : It's a **Client Management system** used by solicitors for management of clients and Lawyers, storing and tracking data, files, activities, scheduling meetings and sending court notifications to clients through emails etc.,.

   Contribution : Have created a calendar and meeting scheduling dashboard connected with O365 contacts, activities, History pages in the application and integrated Apis using Redux-toolkit, Material UI, Axios, and typescript .

4. Title : ==Senior Long Term Care== – [Open Site](#) (Requires VPN)

   Client : Govt of Canada, Nova Scotia

   Context : This is a **Project Investigation website** used by retired Govt employees to avail the benefits of reimbursement schemes offered by the State. Its functionalities include, uploading the facility documents and claiming reimbursements by filling out the series of forms and managing these requests from Admin portal through investigation.

   Contribution : Have created the Admin dashboard, Advanced filter page for the facilities, file management and forms for the facility adding and management process. Tools used for this work are Redux-toolkit, typescript, Material UI and Axios.

3. Title : ==FutureWell== – https://authen.com/

   Client : Authen

SKILLS :

UI Design:
- HTML(Version-5)
- CSS(Version-3)
- Java Script(ES-6)

Front end Libraries:
- React JS
- Typescript
- Next Js (Frame work)

Styling Libraries:
- Material UI
- Tailwind CSS
- Chakra UI
- BootStrap

State-Management:
- Redux
- Context API
- Redux - toolkit

Server-side Tools:
- Axios for API calls
- React Query
- MySQL
- Postman

Utility Libraries:
- Yup
- Moment
- React Table
- Calendars

Context : Authen enables consumers and supply chain participants to ensure the authenticity, traceability, and sustainability of food and product ingredients. It provides a total view of data – tracking the entire supply chain journey of a consumer food product or individual ingredient.

Contribution : Have developed various modules interlinked with each other in the application and worked on forms, filters and Dashboard. Skills used are React.js, Chakra UI, Material UI, React Query, Axios, Context Api and yup library for form validations.

2. **Title :** SourceBae – https://sourcebae.com/

   Client : Shethink

   Context : It's an **Employee outsourcing platform** for clients and agencies to choose the developers with the required skills and select the packages as per the requirement of the project.

   Contribution : Have worked on the entire UI translating Figma wireframes into high quality code and worked on animations and transitions using Bootstrap, tailwind css, React.js, and TypeScript.

1. **Title :** RecruitBae – https://recruitbae.com/blog/

   Client : Shethink

   Context : It's an **Assessment and Evaluation** platform to screen candidates during the hiring process and allows admin to create custom assessments and view the report cards generated with the candidate's test results and their performance on the Dashboard.

   Contribution : Have worked on the design, file Handling and API integrations of this website using React.js, tailwind, CSS, Scss, Axios, and TypeScript .

Career Objective

- To collaborate with a team and work on challenging projects, learn from experienced developers, and contribute to the success of the organization and client while continuously improving my skills.

Education

- Graduated in Electrical and Electronics Engineering from Hindustan University with 8.6 CGPA in the year June 2020.

- Formik
- Data grid e.t.c.,

Version Management Tools:
- Git
- GitHub
- Git Lab
- Bit Bucket

Work Environment:
- Agile Methodology
- Scrum
- Jira for ticket management

GOAL
- To Become a Full-Stack Developer and be able to handle the project life cycle independently

HOBBIES
- Experimenting with new features of React JS in personal projects
- Exploring relevant technologies

PERSONAL INFO
- **DOB**: 12-June-1999
