Profile

Mid-level Full Stack Developer with 5.5+ years of experience in designing, developing, and deploying scalable web applications using React.js, Node.js, Express.js, MongoDB, and TypeScript. Experienced in building web applications, REST APIs, authentication systems, and performance-focused solutions while working with stakeholders, mentoring developers, and delivering projects in Agile teams. Strong problem-solving, and management skills.

Technical Skills

Frontend: React.js, TypeScript, Redux Toolkit, Context API, Hooks, React Native, Next.js, Responsive Design, SSR, CSR, HTML, CSS, JavaScript

Backend: Node.js, Express.js, REST APIs, JWT Authentication, SSO, Role-Based Access Control (RBAC), Redis, GraphQL,

Databases & Storage: MongoDB, MySQL, AWS S3, Firebase Firestore

Libraries: Material UI, Chakra UI, Bootstrap, Tailwind CSS, SCSS, React Query, React Hook Form, Yup

Tools: JIRA, Git, GitHub, GitLab, Bitbucket, Tableau, Postman, Thunder Client, Apollo Client

AI Tools: Cursor, Claude, GitHub copilot

Environment: Scrum and Agile methodology

Key Achievements

- Improved application performance by up to 50% through API optimization, caching strategies, lazy loading, and efficient state management.
- Utilized AI-powered development tools for code generation, debugging, refactoring, documentation, and development acceleration, improving productivity and delivery speed
- Mentored 3 junior developers through code reviews, technical guidance, and Agile practices.
- Contributed to technical and system design decisions.
- Participated in sprint planning and technical discussions for enterprise applications.

Work Experience (5.5 years)

Mid-level Full Stack Developer at **Ispace Technologies**, Hyderabad

Dec 2024 - Present

Project 5 - Korn Ferry Talent Suite (Korn Ferry, USA)

- Korn Ferry specializes in talent acquisition, leadership development, and workforce transformation through assessments and analytics.
- Built and enhanced React.js and Node.js modules for talent assessment platforms using reusable components, shared utilities and AI assisted tools for code generation and quality checks.

- Worked with the engineering team to identify expensive queries and optimize using PostgreSQL materialized views and indexing strategies, improving analytics dashboard load times from approximately 5 seconds to under 1 second response time.
- Coordinated requirement gathering, estimation, and technical design discussions with stakeholders. Conducted code reviews, mentored developers, and maintained coding standards.
- Coordinated across development, QA, and deployment teams, supporting CI/CD processes and release activities.

Full Stack Developer at **Verraxis Technologies**, Pune

Dec 2022 – Dec 2024

Project 4 - **Solicitors** (Govt of Canada, Nova Scotia)

- Developed a client management platform serving thousands of users for document management, meeting scheduling, activity tracking, and automated email notifications.
- Enhanced application performance by 30% using React Query caching, lazy loading, API optimization, and memoization.

Project 3 – **Procurement** (Govt of Canada, Nova Scotia)

- Built and integrated 80% of REST APIs for procurement workflows, enabling tender creation, bidder management, evaluation, and award processing. Built admin dashboards, advanced filters, file upload modules, and reusable Material UI components, reducing development effort across modules by up to 50%.

Project 2 - **FutureWell** (Authen, Canada)

- Authen is focused on supply chain traceability, and sustainability for agricultural products. It provides a total view of data, tracking the entire supply chain journey and helps to calculate the carbon footprint of each stage.
- Developed secure authentication and authorization modules using JWT and Role-Based Access Control (RBAC) for multiple user roles. Built dynamic and reusable form modules using React Hook Form and Yup validation schemas.

Software Developer at **Infosys**, Hyderabad

Jan 2021 – Aug 2022

Project 1 - **Verizon** (Verizon, USA)

- Integrated and maintained REST APIs for enterprise ticket management applications.
- Collaborated with cross-functional teams to troubleshoot production issues and improve system stability.

Education: B.Tech (EEE), Hindustan University, Chennai – **CGPA: 8.6**
